**(Fall Semester, 2020-2021)**

**Assignment: Revise Your Manuscript**  
**(Due Date: Oct 27, 2020)**

In this assignment, you are required to revise your original manuscript according to the three reviews and my comments. Please upload the paper, as well as your responses to these reviews, to mycourses and also email them to the reviewers.

The basic considerations for your revision should be:

1. Revise the manuscript according to the reviews.
2. In a separate document, clearly address/respond to reviewers' concerns and suggestions one by one.
  - a. You do not have to accept all suggestions. You may even argue that some or all of the comments are not correct. But, do not reject them straight away, but rather give reasoned responses.
  - b. If you decide to argue against any suggestion, you should provide at least a few good points and explain your position. Do not leave anything not addressed in your response.
  - c. Do acknowledge the reviewers' hard work at the very beginning.
  - d. Have a concise summary, right after the acknowledgement, of all the modifications you have done.
  - e. Clearly respond to the each reviewer's comments one by one.
