

**CISC-810: Research Foundation**  
**(Fall Semester, 2020-2021)**

**Assignment: Preparing a Research Manuscript to Be Reviewed**  
**(Due Date: Oct 06, 2020)**

In this assignment, you are required to prepare a *research manuscript* on a research area of your choice. Please upload the paper to mycourses and also email it to your three peers who are assigned to be its reviewers (see the peer-review assignment table below), which will be your next assignment.

Your manuscript should be in the proper form that is expected for an IEEE/ACM conference/journal. Please note that your manuscript will be judged by your peers and myself, based on both the *perceived quality* of your research methods and results, but most importantly, the proper structure and organization of your paper.

The basic principle on paper length should always be *as long as needed* (within page limit), *as concise as possible*. For the sake of this assignment, you probably should write 2-3 pages.
